

## Orchard Safety Quiz

1. Prior to starting a tractor:
  - a. Make sure driveline safety guards and chains are in place
  - b. Disengage the PTO
  - c. Fasten the seatbelt (only if the tractor has a roll bar)
  - d. Check the brakes and emergency brake
  - e. All of the above
  
2. Prior to working on the tractor (e.g., attaching or detaching a sprayer)
  - a. Stay on the tractor and leave it running while someone else unhooks the sprayer
  - b. Release stored energy (hydraulics), set the brakes, turn the tractor off and remove the key
  - c. Turn the tractor off then release the stored energy (hydraulics) and remove the key
  - d. Always walk around the sprayer, never between the sprayer and the tractor
  - e. Both (b) and (d)
  
3. It is ok to sit on the tailgate of the truck or van to get from one part of the orchard to another:
  - a. True
  - b. False
  - c. Very, very false
  
4. Which of the following are TRUE (circle all that apply)?
  - a. If you can't see, smell or taste pesticide residue the orchard has not been sprayed recently and you can eat fruit right off the tree
  - b. It is ok to wear shorts and a tank top in the orchard when it is really hot outside because heat exhaustion is a bigger risk than pesticide exposure
  - c. You are responsible for checking for pesticide application and REI prior to going to an orchard
  - d. If you wear a short sleeved shirt and get pesticide residue on your arms, the worst thing that can happen is that you might get a rash
  - e. Shower and change into clean clothes after working in an orchard and wash your work clothes separately
  
5. If you get pesticide on your skin what is the BEST way to wash it off (RANK in order 1 – 5):  
 Emergency eyewash from vehicle  
 Irrigation water only  
 Drinking water from vehicle  
 Emergency shower or potable water  
 Irrigation water followed by potable water rinse
