Updated 2/11/2020

* Puget Sound Energy announced its intention to terminate its voluntary participation in the RESIP program effective December 12, 2019. No new incentive applications will be accepted by PSE after December 12, 2019; however, PSE's termination of participation does not affect its obligation to make annual incentive payments to:

- All certified participants in the RESIP and RECRIP programs.
- "Move-in" participants with a previously certified renewable energy system who begin PSE electric service after the effective date of this notice and who obtain certification of eligibility from the WSU Energy Program.
