

Washington State Criminal Sentencing Task Force

Detailed Guide to Potential
Recommendations

Part 1. Vertical Axis Components of the
Sentencing Grid

Draft 6.2.22 Task Force Meeting

Table of Contents

SECTION 1: Background and Key Information about Washington’s Adult Felony Sentencing Grid.....pg 6

- WA Current Felony Sentencing Grid.....pg 7
- FY 2019 Number of Sentences, by Grid Cell.....pg 8
- Standard, Non-Drug Average Sentences and range of Sentences.....pg 9
- Felony Offenses and Classifications.....pg 10
- Links to Key Presentations.....pg 16
- Link to WSIPP Report to the Task Force.....pg 17

SECTION 2: How Task Force Discussions on Each Portion of the Grid are Being Sequenced.....pg 18

SECTION 3: Potential Recommendations 1-5.....pg 28

- **Potential Recommendation 1.....pg 30**

The current supervision model based on surveillance is insufficient, and changes to the grid are based on a broader paradigm shift focused on providing the appropriate treatment and resources for individuals placed in state custody. To sufficiently achieve those goals, changes to the grid must include concurrent changes to the DOC community custody approach to fully adopt the i-COACH model or to adopt a separate form of Community Reentry.

- **Potential Recommendation 2.....pg 32**

Move all felony class B offenses to no higher than OSL 9. Move all felony class C offenses to no higher than OSL 5. Include new legislative/statutory language specifying that: “Class C felony offenses may not exceed offense seriousness level 5. Class B felony offenses may not exceed offense seriousness level 9.”

- **Potential Recommendation 3.....pg 36**

The statutory maximum for class C and class B felonies is 5 and 10 years, respectively. Washington’s current grid contains several cells where the courts are unable to sentence some crimes within the full or partial range because they are greater than the statutory maximum. To address cells where the presumptive sentencing range exceeds the statutory maximum for class C and class B felonies, make maximum of the range in CHS 9+ for OSL V 54 months and for OSL IX 108 months.

- **Potential Recommendation 4.....pg 39**

Establish a sunset committee that reviews offenses that have not been sentenced in the last 5-10-20 years for potential elimination from the criminal code.

- **Potential Recommendation 5.....pg 40**

Require ongoing monitoring and larger, more in-depth statistical reviews after the first few years.

Cont. Table of Contents

SECTION 4: Potential Recommendations 6-9..... pg 41

- **Potential Recommendation 6.....pg 45**

Establish a formula for determining grid cell ranges for OSLs 1-5. Create the grid ranges for OSLs 1 – 5 using 54 as the anchor for the most serious maximum punishment for OSL 9, CHS 9+.

- **Potential Recommendation 7.....pg 56**

If the maximum sentence based on the formula is 12 months or less, the minimum is automatically reduced to zero.

- **Potential Recommendation 8.....pg 59**

Eliminate Straddle Cells: If the maximum based on the formula is more than 12 months, the minimum must be at least 12 months and a day.

- **Potential Recommendation 9.....pg 61**

Keep Straddle Cells Keep Straddle Cells Keep Straddle Cells and Create a State-Funded Intermediate Sanction Zone (*see 9.1*)

- **Potential Recommendation 9.1.....pg 63**

Create a Community Intermediate Sanction and Reintegrative Services Sentencing Alternative Program.

SECTION 5: Potential Recommendations 10-13.....pg 76

- **Potential Recommendation 10.....pg 78**

Eliminate the mandatory minimum for Murder 1.

- **Potential Recommendation 11.....pg 79**

For aggravated murder 1 change the language from:

“Life sentence without parole/death penalty for individuals at or over the age of eighteen. For individuals under the age of eighteen, a term of twenty-five years to life.”

To

“Life sentence without parole/death penalty for individuals at or over the age of twenty-five. For individuals under the age of twenty-five, a term of twenty-five years to life.”

Cont. Table of Contents

- **Potential Recommendation 12**.....pg 80
For all sentences longer than 20 years, require a second chance review at 20 years of incarceration with the presumption of release.
 - **Potential Recommendation 13**.....pg 81, 85
Increase the number of seriousness levels from 16 to 18 and establish a formula for OSL 10-17
 - **Potential Recommendation 13a**.....pg 89
Move Trafficking 1 to OSL 15 with Malicious Explosion of a Substance 1. Move all other offenses up one OSL.
 - **Potential Recommendation 13b**.....pg 92
Collapse the ranges for Murder 1 for Criminal History Scores 0-4 and 5-9+.
- SECTION 6: Potential Recommendations 14**.....pg 95
- **Potential Recommendation 14**.....pg 98
Establish a formula for determining grid cell ranges for OSLs 6-9. Create the grid ranges for OSLs 6 – 9 using 108 as the anchor for the most serious maximum punishment for OSL 9, CHS 9+.

Section 1

Background and Key
Information about Washington's
Adult Felony Sentencing Grid

- Washington’s current felony sentencing guidelines grid consists of **offense seriousness level** (vertical axis) and **criminal history score** (horizontal axis).
- The rows on the grid represent different **Offense Seriousness Levels (OSLs)** and range from 1 to 16. Higher OSLs correspond with longer sentence lengths.
- The columns represent different **criminal history scores** and range from 0 to 9 or more. Criminal history scores are determined using a complex calculation (see Appendix...).
- All felonies have a “class”: Class A, Class B, Class C. The class of an offense drops to a class lower if it is an **anticipatory** (attempt, conspiracy, or solicitation) offense, with a few exceptions.

Washington State RCWs include several different offense classifications.

The table here and on the next three pages provide comparisons of the six different classifications including felony class, offense seriousness level, serious violent offenses, violent offenses, sex offenses, and crimes against persons.

Unranked Offenses

- More than 300 offenses (the majority of felony offenses) remain unranked (not assigned an OSL).
- There are A, B, and C class felonies that are unranked.
- Regardless of an individual's criminal history score, **unranked offenses** have a presumptive sentence range is 0 – 12 months of incarceration.
- Sentences for unranked offenses are not integrated into the sentencing guidelines grid.

In June 2021, the Legislature Tasked the Sentencing Guidelines Commission with undertaking a review of the criminal code in three specific areas, to support the ongoing work of the Criminal Sentencing Task Force and in response to recommendations made by the Task Force in its 2020 Report.

1. To examine “unranked” felony offenses and make recommendations as to which of those offenses should be ranked on the adult felony sentencing grid, and which offenses could be advisably repealed.
2. To develop a proposal to move statutes that specifically prescribe felony criminal penalties from the Uniform Controlled Substances Act, Chapter 69.50 RCW, into the Sentencing Reform Act (“SRA”), Chapter 9.94A RCW. This proposal should also include a review of sentences for drug offenses and recommendations to reduce the reliance on punitive sanctions and to restructure outcomes to prioritize a therapeutic model for associated drug offenses.
3. To develop a proposal to consolidate any other criminal statutes that specifically prescribe felony criminal penalties into the SRA, Chapter 9.94A RCW.

Key Presentations to the Task Force

There have been a number of presentations given at Task Force meetings over the last two years.

The purpose and goal of these presentations was to build a common foundation of understanding of WA's felony sentencing system and the sentencing grid. And to help prepare for the indebt technical and detailed discussions about the sentencing grid.

Here are links to those presentations:

- [SRA Overview](#) and elements that impact sentence lengths – prepared by Caseload Forecast Council
- [Sentencing Guidelines presentation](#) – prepared by Lauren Knoth, Washington State Institute for Public Policy
- [History of the Sentencing Reform Act](#)– presentation prepared by Keri-Anne Jetzer, Sentencing Guidelines Commission
- [Washington Felony Sentencing Provisions 1990-2018](#)– timeline prepared by Sentencing Guidelines Commission

WSIPP Report to the Task Force

Examining Washington State's Sentencing Guidelines: A Report to the Criminal Sentencing Task Force (Washington State Institute for Public Policy), May 2021

- [Presentation](#) by Lauren Knoth, (Washington State Institute for Public Policy)
- [Final Report](#)

The Task Force CSTF contracted with WSIPP to examine felony sentencing in Washington State and to provide analytic data to assist with future policy discussions within the CSTF.

Using data from the Caseload Forecast Council, this report reviews the outcomes from FY 2019 felony sentences.

Specifically, the report examines how standard, non-drug sentences vary across the current offense seriousness level based sentencing guideline grid. The report also examines how sentences may vary across and alternative, felony class-based guideline grid.

This report includes an examination of racial disproportionality in sentencing outcomes for standard sentences in the current and alternative guideline grids and for non-standard sentences including enhancements, exceptional sentences, and sentencing alternatives.

In general, the report found that average sentence lengths and incarceration rates may decrease under a class-based grid. However, racial disproportionality in sentencing outcomes was present under both grid systems.

Section 2

How Task Force Discussions
on Each Component of the
Grid are Being Sequenced in
2021 and 2022

At the Beginning of 2021...

- How to deliberately *and* collaboratively work through a grid that is made up of many interconnected elements?
- Recognize it is difficult to break the grid down into part-by-part discussions. However, is also difficult to discuss the grid as a whole without having an in depth understanding of each part and how it connects to other parts.

Where on the Grid to Start the Discussions?

- The first big task of the Grid Subgroup was figuring out where to start on the grid, how to sequence its work, and to present ideas back to the full Task Force early and often.
- In other words, breaking the grid into parts to come up with potential recommendations for each part of the grid that once all is put together, will make up a whole package(s). Once all is put together, the Task Force will be able to discuss the full suite of potential recommendations and then begin working towards consensus deliberations.

Many Components of the Grid...

- Offense Serious Levels
- Felony class – areas on the grid that exceed stat max
- Statutory minimums
- The “Southwest Corner” of the grid
- Cell ranges
- Exceptional sentence (departures above and below)
- Creating zones
- Aggravators
- Mitigators
- Sentencing alternatives
- Enhancements
- Sentencing for young adults
- Criminal History Score
- Three strikes laws
- Two strikes laws
- Criminal history multipliers
- Mandatory consecutive sentencing for serious violent offenses
- Mandatory consecutive sentencing for other offenses
- Information and data available

Keeping in Mind, the 3 Policy Goals:

In 2019, the Legislature established the Washington State Criminal Sentencing Task Force (Task Force) to review state sentencing laws, including a consideration of the Sentencing Guidelines Commission's (SGC) 2019 report, and develop recommendations for the purpose of:

- a) Reducing sentencing implementation complexities and errors;
- b) Improving the effectiveness of the sentencing system; and
- c) Promoting and improving public safety.

And Keeping in Mind, the Task Force's Desired Outcomes:

- Balances discretion across the system and encourages and provides for individual rehabilitation that is trauma informed and based on risk, need, responsivity.
- Addresses multipliers and enhancements and consecutive sentences – sentencing ranges – mandatory portions of sentences – mandatory features that remove judicial discretion and led to longer sentences.
- Provides predictability for all parties.
- Addresses accountability while decreasing unnecessary incarceration(s).
- Avoids shifting population from state prison to jails.
- Addresses inequities in the burden of the costs & workloads associated with incarceration.
- Ensures adequate resources for both DOC & counties.
- Reduces or eliminates disparities / disproportionate impacts.
- Maximizes/increases the information available to the parties and the Judges to make informed decisions.
- Eliminates unnecessary complexity.

Organized the Components (and Sequenced the Discussions) According to the Grid Axis

August - November 2021

Vertical Axis Components

- Offense Serious Levels
- Felony class – areas on the grid that exceed stat max
- Statutory minimums
- The “Southwest Corner” of the grid
- Cell ranges
- Exceptional sentence (departures above and below)
- Creating zones
- Sentencing alternatives
- Sentencing for young adults
- Information and data available

January – July 2022

Horizontal Axis Components

- Methods for Addressing Repeat Violent Offending Behaviors
 - Three strikes laws
 - Two strikes laws
 - Criminal history multipliers
 - Mandatory consecutive sentencing for serious violent offenses
 - Mandatory consecutive sentencing for other offenses
- Aggravators and Mitigators
- Enhancements
- Criminal History Score
- Sentencing for young adults
- Information and data available

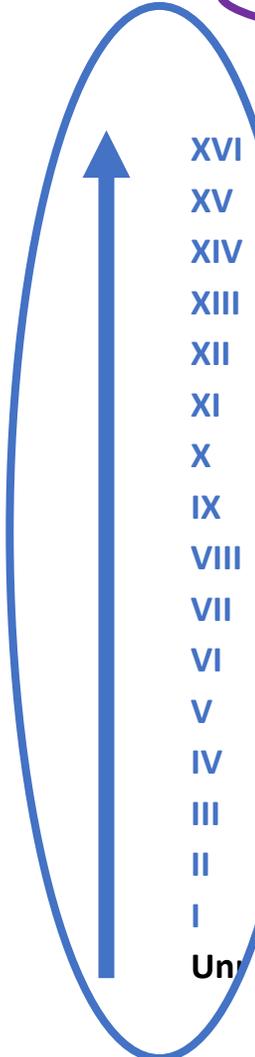

Vertical Axis: Offense Serious Level

Horizontal Axis: Criminal History Score

Un											0 - 365 days									

Vertical Axis:
The rows on the grid represent different **Offense Seriousness Levels (OSLs)** and range from 1 to 16. Higher OSLs correspond with longer sentence lengths.

Horizontal Axis:
The columns represent different **criminal history scores** and range from 0 to 9+. Criminal history scores are determined using a complex calculation.

*****The potential recommendations presented to full Task Force in 2021** are about the individual grid components that are primarily **associated with the vertical axis of the grid.**

	0	1	2	3	4	5	6	7	8	9+

Coming Soon: Potential Recommendations

Horizontal Axis Components

- **Methods for Addressing Repeat Violent Offending Behaviors** (*look at current methods and discuss other ideas, options, models, etc.*):
 - Three strikes laws
 - Two strikes laws
 - Criminal history multipliers
 - Mandatory consecutive sentencing for serious violent offenses
 - Mandatory consecutive sentencing for other offenses
- Aggravators and Mitigators
- Enhancements
- Criminal History Score
- Sentencing for young adults
- Information and data available

After Potential Recommendations on the Horizontal Axis are Presented:

Tentative plan is that horizontal axis potential recommendations will go to the full Task Force for input in February and March 2022.

Meanwhile...

The Grid Subgroup will be revising all potential recommendations: bringing in Task Force input, new ideas, refining ideas and areas where members are and are not aligned, etc...

In order to put together the whole package of potential grid recommendations. This will be what the Task Force then starts working to revise, refine, and ultimately enter into consensus deliberations.

Reminder:

Eventually all potential recommendations will come together to form a complete grid structure.

In essence, *ALL* potential recommendations are sub-recommendations that once put together will be a larger reform package(s) that the full Task Force will then be working towards consensus on.

Section 3

Potential Recommendations 1-5

- # 1: Community Supervision Model
- # 2: Felony Class B no higher than OSL 9 and Felony Class C no higher than OSL 5
- # 3: Addresses sentencing ranges that exceed the statutory maximum for class C and class B felonies
- # 4: Offenses Sunset Committee
- # 5: Ongoing Monitoring and Evaluation of any Changes to the Grid

The Sentencing Grid Subgroup discussions on the vertical axis began with a three-pronged approach to address grid cell ranges, sentence lengths, and zones:

1. Expanding and revising the southwest corner of the grid.
2. Addressing midrange OSL cells to avoid presumptive sentences that exceed statutory maximum of Class C and/or B felonies.
3. Ways to reduce excessively long sentences, while maintaining accountability for serious offenses.

Offense Seriousness Level	0	1	2	3	4	5	6	7	8	9+	Total A	Total B	Total C

Lower ranges to expand jail eligibility

Lower ranges to not exceed stat max

Lower ranges systematically by X% to reduce excessive incarceration lengths

Potential Recommendation. 1:

The current supervision model based on surveillance is insufficient, and changes to the grid are based on a broader paradigm shift focused on providing the appropriate treatment and resources for individuals placed in state custody. To sufficiently achieve those goals, changes to the grid must include concurrent changes to the DOC community custody approach to fully adopt the i-COACH model or to adopt a separate form of Community Reentry.

Purpose: Grid Subgroup discussed how any changes to the southwest corner of the grid that reduce incarceration or increase reentry services may increase the number of individuals on community supervision. Therefore, members thought it important that the model of community supervision is supportive rather than surveillance-based.

Current system:

Statutory Maximum Sentences:

- Class A felony offense – Life in Prison
- Class B felony offense – 10 years (120 months) in prison
- Class C felony offense – 5 years (60 months) in prison

Offense Seriousness Level:

- Not tied to felony class
- Ranges from 1-16
- Also 300+ unranked offenses

Presumptive Sentencing Ranges:

- Based on offense seriousness level and criminal history score.
- Sentences increase as seriousness level increases and as criminal history score increases.

Sometimes, these
three sentencing
structures contradict.

Potential Recommendation. 2:

Move all felony class B offenses to no higher than OSL 9. Move all felony class C offenses to no higher than OSL 5. Include new legislative/statutory language specifying that:

*“Class C felony offenses may not exceed offense seriousness level 5.
Class B felony offenses may not exceed offense seriousness level 9.”*

Purpose: creating consistency in the placement of offenses into different seriousness levels, based on felony class. Statutory language helps make changes durable to future legislative decisions. However, legislature could decide to increase felony classes in order to make an offense fit a particular OSL.

Prison (FY19)	Non-Prison (FY19)	Offense Description	Class	OSL
6		AGGRAVATED MURDER 1	A	16
		HOMICIDE BY ABUSE	A	15
		MALICIOUS EXPLOSION 1	A	15
59		MURDER 1	A	15
60		MURDER 2	A	14
		TRAFFICKING 1ST DEGREE	A	14
		MALICIOUS EXPLOSION 2	A	13
		MALICIOUS PLACEMENT OF EXPLOSIVE	A	13
81	1	ASSAULT 1	A	12
2		ASSAULT OF A CHILD 1	A	12
4		COMMER SEX ABUSE A MINOR	A	12

	I							12+-14 m	14-18 m	17-22 m	22-29 m	

Colors are illustrative only. Felony class would not be added to the grid, but the language in the recommendation would functionally sort offenses in OSL by felony class.

Increases consistency between felony class and OSL.

Potential Recommendation. 3:

The statutory maximum for class C and class B felonies is 5 and 10 years, respectively. Washington's current grid contains several cells where the courts are unable to sentence some crimes within the full or partial range because they are greater than the statutory maximum.

To address cells where the presumptive sentencing range exceeds the statutory maximum for class C and class B felonies, make maximum of the range in CHS 9+ for OSL V 54 months and for OSL IX 108 months.

Purpose/Effects:

- Allows for up to 6 months community custody or aggravated sentence for class C felonies
- Allows for up to 12 months community custody or aggravated sentence for class B felonies
- Would reduce the standard ranges for sentences at OSL 9 or lower.

Recommendation reduces the highest punishment to 108.

Recommendation reduces the highest punishment to 54.

Potential Recommendation. 4

Establish a sunset committee that reviews offenses that have not been sentenced in the last 5-10-20 years for potential elimination from the criminal code.

Purpose/Effects:

- Simplifies the criminal code.
- Eliminate offenses that were created as the result of particular incidents that are extremely rare and have not since reoccurred or are no longer applicable.
- We have methods of creating new crimes, but no standard method of eliminating outdated crimes.

Potential Recommendation. 5

Require ongoing monitoring and larger, more in-depth statistical reviews after the first few years.

Purpose:

- Need to provide a way to monitor the effects of implementation on an ongoing basis rather than once every 40 years.
- If early implementation indicates unintended consequences or exacerbation of racial disproportionality, ongoing monitoring will allow for more timely reforms to address concerns.
- Value in both ongoing monitoring and occasional, wholistic reviews (e.g., basic annual reports and larger reports every 5-10 years to assess patterns that have insufficient sample sizes on an individual year-over-year basis).

Section 4

Potential Recommendations 6-9:

- # 6: Formulaic approach for OSL 1-5
- #7: 12 months or less, minimum become zero
- # 8: Eliminate straddle Cells
- #9: Keep straddle cells and create a state-funded intermediate sanction zone
- #9.1: Create a Community Intermediate Sanction and Reintegrative Services Sentencing Alternative Program.

The Current Grid

RCW 9.94A.506

- (1) If the maximum term in the range is one year or less, the minimum term in the range shall be no less than one-third of the maximum term in the range, except that if the maximum term in the range is ninety days or less, the minimum term may be less than one-third of the maximum;
- (2) If the maximum term in the range is greater than one year, the minimum term in the range shall be no less than seventy-five percent of the maximum term in the range, except that for murder in the second degree in seriousness level XIV under RCW 9.94A.510, the minimum term in the range shall be no less than fifty percent of the maximum term in the range.

These limitations (with the exception of Murder 2 in seriousness level 14) were part of the Sentencing Reform Act of 1981 as set by the Legislature. The Sentencing Guidelines Commission was required to incorporate them into its recommended sentence ranges.

The SGC collected data from various agencies from FY1979 – FY1981 to assist in creation of sentence ranges.

RCW 9.94A.506

- (1) If the maximum term in the range is one year or less, the minimum term in the range shall be no less than one-third of the maximum term in the range, except that if the maximum term in the range is ninety days or less, the minimum term may be less than one-third of the maximum;
- (2) If the maximum term in the range is greater than one year, the minimum term in the range shall be no less than seventy-five percent of the maximum term in the range, except that for murder in the second degree in seriousness level XIV under RCW 9.94A.510, the minimum term in the range shall be no less than fifty percent of the maximum term in the range.

Grid Subgroup Considering A Formula

- Durability – creating a structure gives guidance to Legislators for future policy decisions.
 - Currently, the absence of structure means that policies are not always consistent with past practices and lead to continuous variation, exceptions, and inconsistency
- Consistency – creating consistency within the grid.
 - Current grid does not have consistency in the increase in sanctions with OSL or CHS. There isn't a particular way to answer the question: "Why are the ranges what they are?"
 - Formula can directly consider other statutory sentencing regulations like statutory maximum to create consistency across different aspects of the sentencing structure.
- **Note:** recalibration will likely be necessary to make sure certain offenses make sense within the new structure and formula. The focus is not on any particular offense, but rather the State's policy and views on sentencing broadly. Changes to particular OSL's may be necessary once the overall grid structure is established.

Potential Recommendation 6.

Establish a formula for determining grid cell ranges for OSLs 1-5. Create the grid ranges for OSLs 1 – 5 using 54 as the anchor for the most serious maximum punishment for OSL 9, CHS 9+.

Light green cells represent the current Southwest Corner – where sentences are presumptive jail sentences.

Dark green cells represent cells that would now be presumptive jail sentences instead of presumptive prison sentences.

Yellow cells were previously presumptive prison sentences, but are “straddle” cells with the formula, such that sentences may be jail or prison confinement.

Blue cells were previously presumptive prison sentences and are still presumptive prison sentences with the formula.

- Maximums reduced between 2 and 42 months. Average reduction in maximum is only 10 months.
- However, in the current system, judges commonly sentence at the midpoint or below the midpoint, so the maximums were rarely used anyway.
- Judges still able to impose aggravated sentences for cases in which longer confinement times are justified.
- More judges able to impose sentences that are less than the current system allows due to sentences not being appealed.
- Eliminates the potential for disproportionality in sentences (since lower sentences are now within the standard range)

WSIPP report found that mitigated sentences were most common for BIPOC and White defendants with higher levels of CHS. It is possible that courts view the current system as too punitive in cells with higher CHS.

The biggest reductions in sentences are for cells with higher CHS.

Mitigated and aggravated sentences are appealable and potentially imposed disproportionately.

Potential Recommendation 7.

If the maximum sentence based on the formula is 12 months or less, the minimum is automatically reduced to zero.

Justifications and Effects:

- Creates wider discretion for judges in the southwest corner of the grid.
- Expands the number of cells in which there is an option for 0 months incarceration (currently 3 cells).
- Impact on incarceration will vary because of pre-trial confinement.
 - Under current system, some individuals in SW corner sentenced to time served, so no additional incarceration after sentencing.

Potential Concerns:

- Expands ranges in SW corner where WSIPP found frequent disproportionality in sentencing.
- Could lead to geographic differences due to differences in varying philosophies of punishment in combination with wide ranges.
- Judges may be unlikely to sentence to 0 months incarceration without some other alternative (e.g., probation)
 - Could consider integrating a sentencing alternative for SW corner that provides state funding/assistance for a community alternative.

Potential Recommendation 7.

Unr	0 - 365 days																			

Yellow cells were previously presumptive prison sentences, but are “straddle” cells with the formula, such that sentences may be jail or prison confinement.

Potential Recommendation 8.

Eliminate Straddle Cells: *If the maximum based on the formula is more than 12 months, the minimum must be at least 12 months and a day.*

Justifications and Effects:

- Eliminates straddle cells.
- Creates variability in the width of the ranges such that some ranges will be very small.
- Creates more predictability in caseloads for local and state facilities and clarity/predictability about whether a defendant will face a jail or prison sentence.
- Prevents an increase in local resources (jail sentences).

Potential Concerns:

- If there is disproportionality in sentences, potentially bigger consequences on communities of color. If POC are more likely to receive a prison sentence in straddle cells then results: 1) have longer sentences and 2) serve confinement sentences outside their local communities.
- Eliminating straddle cells will make sentences longer in those cells.
- May lead to more trials and/or disagreement within courts based on whether individuals want a jail or prison sentence for a particular case.

Potential Recommendation 8.

Potential Recommendation 9.

Keep Straddle Cells and Create a State-Funded Intermediate Sanction Zone

- Stipulate that sentences for individuals in straddle cells are paid for by the state.
- For sentences in this zone, presumptive sentence is a sentencing alternative that is served locally.
- For sentences in this zone, sentences that are DOC sentences (more than 12 months) could have an option for state Intermediate Sanctions

Effects/Justifications:

- New cells will have a lower mid-point, likely facilitating a small decrease in sentence lengths.
- Provides support for Counties while still allowing State oversight to ensure that community services meet certain standards.
- Supports rehabilitative and non-incarcerative alternatives without increasing financial burden on counties
- Can help support expansions of community services/resources that local counties could then use for other individuals under local sanctions (e.g., SW corner of the grid)
- Shifts focus from retribution/confinement to rehabilitation and community reintegration (reducing collateral consequences of incarceration)
- Provides a check on prosecutorial discretion by creating more opportunities for different outcomes that defendants/defense atty's/judges can impose.

Potential Recommendation 9.

Possible Concerns:

- Geographic differences aren't just due to funding, but fundamental differences in philosophies of punishment, so some courts may still be unlikely or less likely to use intermediate sanction program.
- Potential disparity in who receives the sentencing alternative
 - Could be checked by making the intermediate sanction alternative the presumptive sentence
- Potential for large reductions in sentence lengths.

Potential Recommendation 9.1

Create a Community Intermediate Sanction and Reintegrative Services Sentencing Alternative Program.

Sentencing Alternatives Workgroup looked at options for integrating sentencing alternatives onto the grid and decided to further explore Potential Recommendation 9, which would keep straddle cells and create a state-funded community intermediate sanctions program.

The Workgroup met several times to discuss and has put together a draft proposal as a starting point to build out what such a program would entail. This proposal is described on the next several slides.

CISRS: County Intermediate Sancitons and Reintegrative Services Sentencing Alternative.
RDOSA: Residential DOSA, for eligible individuals based on offense type and criminal history
PDOSA: Prison DOSA, for eligible individuals based on offense type and criminal history
FOSA: Parenting Sentencing Alternative, for eligible individuals
 Cells in the hatched zone may be eligible for the FTOW sentencing alternative.

Overview

Counties would operate their intermediate sanctions (CISRS) programs and the state would oversee to ensure programs meet a minimum level of care.

- Counties would operate their intermediate sanctions program, but the program must receive state approval every XX years to ensure that the programs are meeting a minimum standard. The state could set requirements for that plan that must be reviewed annually or biannually (i.e., approvals for each two-year budget cycle).

- Programs would need two components: 1) supervision/sanctions that meet minimum standards and 2) access to rehabilitative and reintegration services. This is not just a program focused on surveillance, but also treatment.
- The state could also set requirements for the type of data that must be collected and reported (to the state) on an annual basis.

Overview Cont.

- The state may establish certain minimum levels of care for the general program, but also for specific populations of individuals. For example, the state may require that individuals receiving a CISRS sentence for an offense at a certain seriousness level or for an individual with a certain level of criminal history must have a higher level of supervision (such as electronic home monitoring or day reporting centers).

- Similarly, the state may require that all individuals sentenced to the CISRS program receive some type of needs assessment to inform treatment.
- The state may also create consistent standards for what types of behaviors would require a revocation of the CISRS sentence and a return to local incarceration.

Zone 1 Cont.

Zone 1 is the expanded “southwest corner” of the grid. Jail sentences would be locally resourced, as in the status quo. If sentenced to CISRS program, access to funds via CISRS block grant.

- This potential recommendation expands ranges in the southwest corner, where WSIPP found frequent disproportionality in sentencing.
- However, this change could lead to geographic differences due to differences in varying philosophies of punishment in combination with wide ranges. And judges may be unlikely to sentence to 0 months incarceration without some other alternative (e.g., probation).
- There were some concerns that some judges may be unlikely to sentence individuals to a local sentencing alternative. To incentivize the development and use of these programs, individuals sentenced to the CISRS alternative would be eligible for the use of state funds while those sentenced to local confinement in jail would be served only by local resources.

Zone 2

Zone 2 is the area where there are straddle cells – such that sentences may be jail or prison confinement.

Stipulate that all sentences for individuals in Zone 2 are paid for by the state.

- Justification: if they are not prison sentences, it is saving DOC funding by reducing DOC caseloads, so that funding could be diverted to the local courts to support non-incarcerative alternatives.

For sentences in this zone, presumptive sentence is a sentencing alternative that is served locally.

- Could be operated by local courts but funded by the state.
- Reduces prison sentences/beds/costs, so cost savings can be used to fund the CISRS programs.

Zone 3

Sentences in Zone 3 are DOC sentences and may be eligible for existing sentencing alternatives.

- By reducing the number of DOC sentences in Zone 1 and 2, DOC can increase its focus on providing appropriate services for individuals sentenced in Zone 3.

State Prison

Zone 3:
DOS, FOSA, State Prison

Zone 2:
CISRS, DOS, FOSA
<=12 Jail; >12 Prison

Zone 1:
CISRS, RDOSA, Jail

Examples of Intermediate Sanctions

Sentencing options that fall between probation and incarceration.

- Intensive supervision probation
- Day reporting centers
- House arrest
- Electronic home monitoring
- Community service
- Intermittent confinement (e.g., work release or weekenders)
- Mandatory treatment conditions
- Residential community corrections (e.g., halfway houses)

Funding Model

Funding would be provided by the State to counties through a block grant based on a formula, modeled on the Juvenile Court Block Grant Program.

- Funds would be allocated based on county size, caseloads, use of the program, etc.
- There would be a minimum level of funding to support staffing and capital costs of running a CISRS program.
- Funds from the block grant program can support staffing and capital costs that may also allow counties to expand the types of services offered to individuals in jail or individuals sentenced in district court.
- Thus, this program could have beneficial spillover effects for an even larger population of individuals involved in the criminal legal system.
- Additional savings as an effect of the investment in effective programs to reduce overall recidivism and future caseloads.

Juvenile Court Block Grant

In accordance with RCW13.06.020, the state appropriates approximately \$38 million to local county juvenile courts each two-year budget cycle.

To reduce reliance on state-operated institutions, this funding provides community-based responses for youth who commit crimes.

The funding also assists with the application of disposition (sentencing) programs.

DCYF's Juvenile Rehabilitation program administers these dollars across the 33 county juvenile court jurisdictions.

Funded Services and Programs for Victims

- Victim services and programs would also be included in the program.
- This could include a broad array of services and programs that respond to the emotional and physical needs of victims such as support services throughout the criminal legal process, counseling, crisis intervention, shelter, trauma and therapeutic services, restorative justice, etc.

Questions the Alternatives Workgroup Has Identified So Far:

- How should requirements for an IS sentence be determined? Would the terms (e.g., EHM vs. day reporting center) be determined by the judge ordering the alternative or by the local IS program supervisor?
- What level of quality assurance and oversight would the state provide? For Juvenile EBPs, the state operates quality assurance protocols and standards for the local court programs. The proposed IS structure is intended to provide more flexibility to the local courts, so there may not be an exhaustive list of specific programs offered in the courts.
- Should the grant funding include funds for ongoing research/evaluation?

Questions the Alternatives Workgroup Has Identified So Far:

- How do the therapeutic programs develop locally? What about locations that don't have the access to these types of programs?
 - State could have general types of services that a qualifying CISRS program should provide, e.g., employment/job training, education, housing, cognitive behavioral training.
- How to address tort concerns w/ local liability?
- How could the implementation structure (i.e., centralized, decentralized, hybrid) most equitably serve individuals who do not reside in their county of conviction and court oversight?
- Resource allocations: how to recognize different resource needs—to build a new program, further support existing programs that are under resourced, or expand robust programs.

Section 5

Potential Recommendations # 10-13

- # 10: Eliminate mandatory minimum for Murder 1
- # 11: For aggravated murder 1, change the age for life without parole.
- # 12: Second chance review at 20 years
- # 13: Increasing the number of OSLs and creating the formula for OSL 10-17.
- # 13a: Move Trafficking 1 to OSL 15 with Malicious Explosion of a Substance 1.
Move all other offenses up one OSL
- # 13b: Collapse the ranges for Murder 1 for Criminal History Scores 0-4 and 5-9+

Reminder: this was the portion of the grid potential recs 6-9 addresses.

Potential Recommendation # 10

Eliminate the mandatory minimum for Murder 1.

Grid Group Discussion Points:

- Little difference between M1 and M2.
- Mandatory minimum gives more leverage/power/discretion to prosecutors particularly in plea bargaining process.
- Potential racial disproportionality in who gets charged with M1 vs M2.

Potential Recommendation # 11

For aggravated murder 1 change the language from:

*“Life sentence without parole/death penalty for individuals at or over the age of **eighteen**. For individuals under the age of **eighteen**, a term of twenty-five years to life.”*

To

*“Life sentence without parole/death penalty for individuals at or over the age of **twenty-five**. For individuals under the age of **twenty-five**, a term of twenty-five years to life.”*

Grid Group Discussion Points:

- Recent Supreme Court decisions recognize the emerging brain science and Washington Legislature has made other policy changes recognizing continued brain development between the ages of 18 and 25.

Potential Recommendation # 12

For all sentences longer than 20 years, require a second chance review at 20 years of incarceration with the presumption of release.

Grid Group Discussion Points:

- Similar to current statutes for individuals convicted of offenses committed before age 18.
- Recognizes that extremely long sentences may not be beneficial/useful.
- Acknowledges potential for rehabilitation and redeemability.

Potential Recommendations # 13, 13a, and 13b

- Potential modifications to OSLs 10 and above.
- Focus is on violent offenses.
- Focus is on implementation of the consistent/formulaic approach to setting guideline ranges while considering unique characteristics of offenses in the upper range.

Grid Group Discussion Points/Considerations:

- Formula provides an answer to “why this range”
- Creates logical consistency in how sentence lengths change as OSL increases and as CHS increases
- Long term durability of changes
- Focus is on creating the structure of the grid. Individual offenses may need to be recalibrated on the new grid to account for the ad-hoc decisions in the past.

Offenses at Upper OSLs

OSL	Offense	Total FY19
16	Aggravated murder 1	6
15	Homicide by abuse	0
15	Malicious explosion of a substance 1	0
15	Murder 1	59
14	Murder 2	60
14	Trafficking 1st degree	0
13	Malicious explosion of a substance 2	0
13	Malicious placement of explosives 1	0
12	Assault 1	82
12	Assault of a child 1	2
12	Commercial sex abuse a minor - promote	4
12	Rape 1	10
12	Rape of a child 1	83
12	Trafficking 2nd degree	2
11	Manslaughter 1	20
11	Rape 2	20
11	Rape of a child 2	67
11	Vehicular homicide - DUI	24
11	Vehicular homicide – reckless endangerment	3
10	Child molestation 1	107
10	Indecent liberties with force	8
10	Kidnapping 1	13
10	Leading organized crime	2
10	Sexually violent predator escape	0

Reminder:
Previous recommendations moved several Class B felony offenses out of these OSLs, so there are 3 offenses omitted here.

OSL 10-16 are all Class A felonies – thus a separate zone for violent offenses.

Other Sentencing Laws

- RCW 9.94A.540
 - Murder in the first degree - mandatory minimum 20 years
 - Rape in the first degree – mandatory minimum 5 years
 - Sexually violent predator escape – mandatory minimum 5 years
 - Assault 1 (where used force or means likely to result in death or intended to kill the victim) – mandatory minimum 5 years
- RCW 10.95.030
 - Aggravated first degree murder – mandatory life in prison without possibility of parole*
- RCW 9.94A.506
 - For murder in the second degree in seriousness level XIV, the minimum term shall be no less than 50 percent of the maximum term.

These exceptions complicate the use of a standardized/formulaic approach.

Potential Recommendation # 13

Increase the number of seriousness levels from 16 to 18 and establish a formula for OSL 10-17:

- **OSL 18** is Aggravated Murder with a range of 25 to life regardless of Criminal History Score (as it currently is in SL 16)
- **OSL 17** is Murder 1 and Homicide by Abuse with current ranges for Murder 1.
 - Minimum for CHS 0 OSL 17 set at mandatory minimum as the anchor.
 - Maximum from CHS 1 – 9+ is 105% of prior maximum.
 - Minimum from CHS 1-9+ is 75% of maximum for each cell.
- **OSL 16** is Murder 2 with current maximums, but minimums made consistent at 50% of the maximum.
- **OSL 15 to 10** are as classified currently except for the offenses pulled out above.
- **The formula is used starting at OSL 16** (OSL 10-16, including M2):
 - **High ranges:**
 - Current maximum sentence for Murder 2 is used as the anchor for OSL 10-16.
 - Maximum at 0 CHS is 35% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 110% of prior maximum for OSL 10-16.
 - Minimum is 75% of the maximum for each cell.
 - **Mid-ranges:**
 - Maximum at 0 CHS is 20% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 120% of prior maximum.
 - Minimum is 75% of the maximum for each cell.
 - **Low-ranges:**
 - Maximum at 0 CHS is 20% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 120% of prior maximum.
 - Minimum is 30% of the maximum for each cell.

Potential Recommendation # 13

The formula is used starting at OSL 16 (OSL 10-16, including M2):

- **High ranges:**
 - Current maximum sentence for Murder 2 is used as the anchor for OSL 10-16.
 - Maximum at 0 CHS is 35% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 110% of prior maximum for OSL 10-16.
 - Minimum is 75% of the maximum for each cell.
- **Mid-ranges:**
 - Maximum at 0 CHS is 20% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 120% of prior maximum.
 - Minimum is 75% of the maximum for each cell.
- **Low-ranges:**
 - Maximum at 0 CHS is 20% of Maximum at CHS 9+.
 - Maximum from CHS 1 – 8 is 120% of prior maximum.
 - Minimum is 30% of the maximum for each cell.

Formula is same as OSL 1-5

- Anchor is the maximum for OSL 16
- Maximum for CHS 9+ in each row established by creating equal intervals in the maximum for each row.
- Maximum for CHS 0 is calculated as 35% of the CHS 9+ maximum.
- Maximum for each CHS after CHS 0 is 110% of the maximum for the previous CHS.
- Minimum is 75% of the maximum.

Potential Recommendation # 13

- **Murder 1, Homicide by Abuse, and Murder 2 moved to their own OSLs.**
- **Expands the grid from 16 to 18 rows.**
- **Ranges for Murder 1 unchanged. Maxs for Murder 2 are the same, but minimums are different.**

Offenses Within Each SL		0	1	2	3	4	5	6	7	8	9+

*Blue cells indicate a decrease in the minimum or maximum.

Potential Recommendation 13a

*Move Trafficking 1 to OSL 15 with Malicious Explosion of a Substance 1.
Move all other offenses up one OSL.*

- If the grid is expanded to 18 rows, there are two OSLs that would have only one offense (OSL 15 with Malicious Explosion of a Substance 1 and OSL 14 with Trafficking 1).
- Increasing the OSL by 1 would moderate the reduction in sentences that result from applying the formula to OSL 10 and above.
- This leaves OSL 10 empty, creating room to recalibrate offenses below OSL 10.

Proposed Potential Changes 13a

- Collapse Malicious Explosion 1 & Trafficking 1 into SL 15. Move all other offenses up 1 SL.
- Leaves open OSL 10 for Class A felonies in OSL 9 and below that may need to be recalibrated to 10 or above under new grid structure.

Offenses Within Each SL		0	1	2	3	4	5	6	7	8	9+										
Aggr Murder	18	Life Sentence without parole/death penalty for defendants at or over the age of 18. For defendants under the age of 18, a term of 25 years to Life

Potential Recommendation # 13b

Collapse the ranges for Murder 1 for Criminal History Scores 0-4 and 5-9+.

- Because of the mandatory minimum, we cannot apply the formula to Murder 1.
- Proposed ranges would keep the current minimum for CHS 0 and approximate the Maximum in CHS 4, the Minimum in CHS 5 and the Maximum in CHS 9+

		0	1	2	3	4	5	6	7	8	9+										
Aggr Murder 1	XVI	Life Sentence without parole/death penalty for defendants at or over the age of 18. For defendants under the age of 18, a term of 25 years to Life																			
Murder 1 (mandatory minimum of 20 years) Homicide by Abuse (no mandatory minimum)	XV	240	320	250	333	261	347	271	361	281	374	291	388	312	416	338	450	370	493	411	548

		Life Sentence without parole/death penalty for defendants at or over the age of 18. For defendants under the age of 18, a term of 25 years to Life																			
Aggr Murder 1	XVI																				
Murder 1 (mandatory minimum of 20 years) Homicide by Abuse (no mandatory minimum)	XV	240 - 360										300-540									
Murder 2	XIV	123	220	134	234	144	244	154	254	165	265	175	275	195	295	216	316	257	357	298	397

Potential Recommendation # 13b

Collapse the ranges for Murder 1 for Criminal History Scores 0-4 and 5-9+.

Grid Group Discussion points:

- Would increase the maximum in some cases (7 columns) and would decrease the minimum for some cases (8 columns).
- Would it increase or decrease prosecutorial discretion? Defense discretion?
- The difference between Murder 1 and Murder 2 is minimal
- Potential racial disproportionality in who is charged with M1 vs. M2

		0	1	2	3	4	5	6	7	8	9+										
Aggr Murder 1	XVI	Life Sentence without parole/death penalty for defendants at or over the age of 18. For defendants under the age of 18, a term of 25 years to Life																			
Murder 1 (mandatory minimum of 20 years) Homicide by Abuse (no mandatory minimum)	XV	240	320	250	333	261	347	271	361	281	374	291	388	312	416	338	450	370	493	411	548

To Consider – New Zone

- Potential to create new “zone” on the grid for OSL 10 and above
- Zone includes only Class A felonies – thus, violent offenses
- Policies affecting zones do not have to be limited to sentence lengths

- **What other forms of accountability could help victims?**
 - Require the court give victims the option to submit Victim Impact Statement in this zone?
 - Mandatory restitution in this zone?

- **What other forms of accountability could be integrated for defendants?**
 - Require drug and alcohol assessments?
 - Require some form of rehabilitative treatment?
 - Create special sentencing conditions for repeat-violent convictions?

Section 6

Reminder:

Previous recommendations moved several Class C felony offenses out of these OSLs, so there are 8 offenses omitted here.

Potential Recommendation 14.

Establish a formula for determining grid cell ranges for OSLs 6-9. Create the grid ranges for OSLs 6 – 9 using 108 as the anchor for the most serious maximum punishment for OSL 9, CHS 9+.

- Previous recommendations suggested moving a few Class C felonies from OSL 6-9 to OSLs 5 and below.
- The majority of offenses in OSL 6-9 are Class B felonies with a statutory maximum of 120 months.
- Setting the maximum punishment at 108 months instead of 120 allows for some judicial discretion to issue aggravated sentences when warranted and allows for some sentences with some time in community custody.

Potential Recommendation 14.

Formula is same as other portions of the grid

- Anchor is the maximum for OSL 9
- Maximum for CHS 9+ in each row established by creating equal intervals in the maximum for each row.
- Maximum for CHS 0 is calculated as 20% of the CHS 9+ maximum.
- Maximum for each CHS after CHS 0 is 120% of the maximum for the previous CHS.
- Minimum is 75% of the maximum.

The Formula for OSL 6-9

3

	0	1	2	3	4	5	6	7	8	9+										
9	16.0	21.6	19.0	25.9	23.0	31.1	27.0	37.3	33.0	44.8	40.0	53.7	48.0	64.5	58.0	77.4	69.0	92.9	81.0	108.0

Recalibration Example

Previous Recommendation 13a empties out OSL 10. Class A felonies in OSL 6-9 could be recalibrated (moved to a higher OSL) to moderate the reductions in sentences for Class A felonies since they are not held to the Class B stat max.

- We've previously mentioned the possible need to recalibrate offenses to appropriately fit on the new grid.
- Reductions in sentences in OSL 6-9 may be more palatable for Class B felonies, but less desirable for Class A felonies.
- Recalibration may also occur for Class B felonies in OSL 1-5.
- Could be a decision made with these recommendations or could be a separate recommendation for SGC to examine and propose recalibrations of offenses under the new structure.

Recalibration Example

To Consider – Other forms of accountability

- Reductions in sentence lengths could coincide with increases in other forms of accountability.
- **What other forms of accountability could help victims for class B offenses?**
 - Mandatory restitution in this zone?
- **What other forms of accountability could be integrated for defendants in the middle of the grid?**
 - Require drug and alcohol assessments?
 - Partial confinement alternatives?
 - Different requirement for violent or sex offenses?
