

Plant Biodiversity Introduction

Program Priority Plant Biodiversity: WSU Extension Master Gardener Program volunteers teach stewardship of diverse ecosystems through invasive species management, native species conservation and restoration in landscapes.

Please rate your knowledge on the following statements before attending this event and after attending the event.

Survey purpose

You are receiving this survey because you attended a WSU Extension Master Gardener Program event. Your responses will help us better serve our communities with relevant research-based gardening information.

Date

Date you attended this event. *(If this was a multi-day event, please record the first day only.)*

Date (mm/dd/yyyy)

County

Where did the educational event you attended take place?

Gardening experience

How many years have you been gardening?

- Less than 1 year
- 1-3 years
- 4-6 years
- More than 7 years

The importance of plant biodiversity

Rate your knowledge on the importance of plant biodiversity to human health.

Changes I will make- Plant biodiversity

Steps I will commit to take to increase plant biodiversity. (*Check all that apply*)

- I will seek information to positively identify suspected invasive plants and animals.
- I will report invasive species to the Washington Invasive Species Council (WISC).
- I will remove invasive plants that may already be in my home landscape.
- I will plant more native plants in my landscape.
- I will intentionally install a variety of plants using the principle of right plant, right place.
- I will convert part of my lawn area with biodiverse plants.
- I will install a variety of plants including natives in other gardens that I'm involved in (school gardens, community gardens, parks, etc.)
