

Plant Problems:

What Tissue Affected

Step 1: Examine Plant:
Determine if Problem exists.
Step 2: Hypothesis Development.

Insect/Mite Pests	Pathogens	Larger pests
--------------------------	------------------	---------------------

a) feeding habit

- chew/sucking

b) metamorphosis

- complex
- simple

a) fungal

b) bacterial

c) viral

d) nematode

e) parasitic plant

a) slug/snail

b) rodent/deer

c) dog

d) bird

e) etc.

A) Mechanical

B) Chemical

C) Physical/ Environmental

Step 3: Look for evidence to support hypothesis.

Step 4: Evaluation of Hypothesis and evidence.
