

Snohomish County 4-H

Stay Home, Stay Healthy

Learning Tool for week of May 11th, 2020

Hello 4-H Community!

I wanted to show you another cool online learning option that I relied heavily on for home school options for my teen and my 6-year-old: [Kahn Academy](#). My son has since used Kahn Academy to help him with school projects or to learn skills that he wasn't able to learn from his teachers.

[Kahn Academy](#) is a neat website. It offers some great learning options that are self-paced and tackle a wide range of subjects. Ever wanted to learn computer programming? Try the Kahn Academy [Computer Programming Courses!](#)

Kahn Academy is not just for the older kids; there is a great app that can be downloaded for free for younger kids. [Kahn Academy Kids](#) inspires youth to learn at their own pace using a fun interactive platform with great characters, games, and stories.

I hope you find these useful and fun!
