

# Snohomish County 4-H

## Stay Home, Stay Healthy

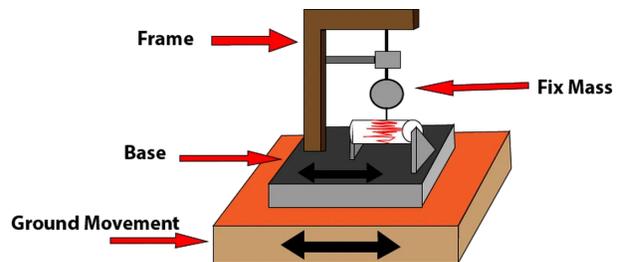

### Learning Tool for week of July 12th, 2020

Many of us have been using YouTube for quite a long time. But have you heard of [YouTube Kids](#)? I hope you have! From their website:

“YouTube Kids was created to give kids a more contained environment that makes it simpler and more fun for them to explore on their own, and easier for parents and caregivers to guide their journey as they discover new and exciting interests along the way.”

I use this website frequently when looking for great learning content for my 7-year-old. I want to point you toward one video in particular, as it is a fun activity you can do at home easily! [Create your own seismograph](#)! This is a fun activity

**Seismograph**

to learn about seismographs and to show how shaking in the earth (the box in this case) can be recorded and measured! You can explore more fun science activities from the [Science Buddies YouTube](#) channel.

Happy YouTubing, families!
