

Snohomish County 4-H

Stay Home, Stay Healthy

Learning Tool for week of July 17th, 2020

Hello 4-H Community!

Do you remember way back on April 2nd when we uploaded the [Explore National Parks video](#) that introduced you all to Google Earth? Well, if you don't, check it out!

To go back to Google Earth, we have a fun new activity for you this week: A Google Earth Scavenger Hunt! Google Earth is such a great tool to explore our planet – you can jump from the highest mountain to the deepest canyon with the click of a button. But if you want a little help finding some neat things, this scavenger hunt is for you! There are three ways you can participate:

1. [Download this PDF](#) and print it and explore on your computer. You won't be able to copy/paste, but you can draw what you see!
2. Use [this PowerPoint file](#) – this is a great way because you can type right into it and copy/paste the coordinates into Google Earth.
3. If you have a Gmail account, use this link to a [Google Slides](#). Before you start typing, please click on File > Make a Copy, and copy this to your own Google Drive so you don't accidentally change the original version.

I hope this is as fun for you as it was for us – trust me, the entire team played around with the neat sights! Drop in to our [Afternoon Tea Time](#) if you are having a hard time with this resource or just want to show us some cool things you have found.

Happy learning!
