

# Snohomish County 4-H

## Stay Home, Stay Healthy

Learning Tool for week of July 5<sup>th</sup>, 2020

Most of you likely recognize the image to the left. The Rubik's Cube became a global phenomenon in the 1970's, thanks to Hungarian professor of architecture Ernő Rubik. This seemingly simple puzzle fascinated and thrilled some and proved to be endlessly frustrating for others. I find myself

somewhere in between those two camps. However, after getting some online help, I have found playing with a Rubik's Cube to be distractingly fun – my own little fidget spinner! If you have one at home, great! Here is a wonderful website to help you [solve the Rubik's Cube](https://rubiks-cu.be/). If you don't have one at home, no problem!! That same website has a virtual cube that you can work on. This is a very fun activity and a great summer skill to learn!

Have fun learning the Rubik's cube 4-H families!!
