STATE OF WASHINGTON

(91-000) Series AC54-1

This release presents figures from the 1954 Census of Agriculture, together with available comparative data from the 1950 Census of Agriculture. The figures from the 1954 Census are preliminary and are subject to revision. A similar report will be released for every county in the United States. A preliminary report, carrying State totals only, will be issued following the publication of figures for all of the counties in the State. After that, final figures for this county and for other counties in the State will be published in a State Report.

Generally, the data for both 1954 and 1950 are based upon the tabulation of reports for all farms in the county. However, the 1954 and 1950 data for items followed by a star (*) represent estimates for all farms made on the basis of reports from a sample of approximately 20 percent of the farms. These estimates are subject to sampling errors and hence will not agree exactly with totals obtained by a tabulation of data for all farms.

Inventory items are for October–November for 1954 and for April for 1950; and production items are for the calendar years 1954 and 1949.
