

Become a WSU Master Gardener Volunteer!

The WSU Extension Master Gardener Program trains volunteers to be effective community educators in home gardening and environmental stewardship.

The purpose of the WSU Extension Master Gardener Program is to provide public education in home gardening and environmental stewardship generated from research at WSU and other university systems.

Volunteers are trained by WSU faculty and staff to be community educators about issues of importance in their local communities that enhance natural resources, sustain communities and improve the health and wellness of WA residents.

Gardening for Everyone is only one of the community gardening education programs of the WSU Lewis County Master Gardeners.

Contact us today to learn how you can join us. Enrollment is open all year.
