

WSU Clark County Extension

Master Gardener Program

Clark County Master Gardener Program saw incredible growth and impact in 2025! The year was paved with workshops and outreach events filled to capacity, local students growing greens for their own salads, thoughtful questions sent into the Answer Clinic, fifteen Heritage Farm tours, six On the Road Tours, and so much more. We are thankful for the support of so many, including the more than 340 volunteers empowering home gardeners to cultivate thriving landscapes and abundant food gardens through science-based, locally relevant information and support. A special thank you to our donors; your monetary support of the program continues to have a lasting impact on Clark County.
