

Touch & Learn Emotions

Cost: \$1.99

Publisher: Innovative Mobile Apps

Platform: iOS only.

Description: A gaming platform which helps kids understand body language and emotions from images and figures. It's fun, easy, and simple to use, wrong answers do not interfere with the game-based process.

Features: Option for customizing the game for users to hear their parents or teachers voices, are able to adjust almost everything to the users liking in regard to format, font size, etc.

Grade Levels: Pre-K +

Subject Area: Social Skills/ Emotions

Assessments: No, this app does not record student performance.

Strengths: Supplemental tool for helping young students to understand other people's emotions and body language. It also has the ability to customize the display of apps features. It is great to receive feedback to allow the user to know if they are on the right track or not.

Weaknesses: It does not offer multiple languages other than English. It is also disappointing that it does not allow for advancement to more complex emotions as students get older. This is geared for young students only, which can also be a limitation.

Overall Impression: It is an app worth trying, especially if your child needs assistance in understanding others emotions & body language.

Connection to UDL Guidelines:

Develop self-assessment and reflection (9.3)
