

AR Basketball

Cost: Free of Charge

Publisher: Triangle Factory, 2017.

Platform: iOS devices

Description: AR Basketball is a fun interactive game for all ages. Using the basketball hoop and ball that appears on the screen of your iOS devices, you can practice shooting baskets. This would be a great way to incorporate fraction lesson plans for grades 3-6.

Features: This app has the ability to count how many points or baskets you make. It can keep score, or you can challenge yourself by seeing how many baskets you can make in an allotted amount of time, etc.

Grade Levels: All

Subject Area: Math

Assessments: No, this app does not record student performance. However, it *does* record score in order to assist with the potential lesson plan implementation.

Strengths: Very user friendly and straightforward in regards to how to actually use and begin the app.

Weaknesses: There is the potential for a lag in the flow of the ball going into the basket which can sometimes make it challenging in regard to accuracy.

Overall Impression: It has the potential to be a very fun and engaging game for students and teachers.
