

*Pythium*

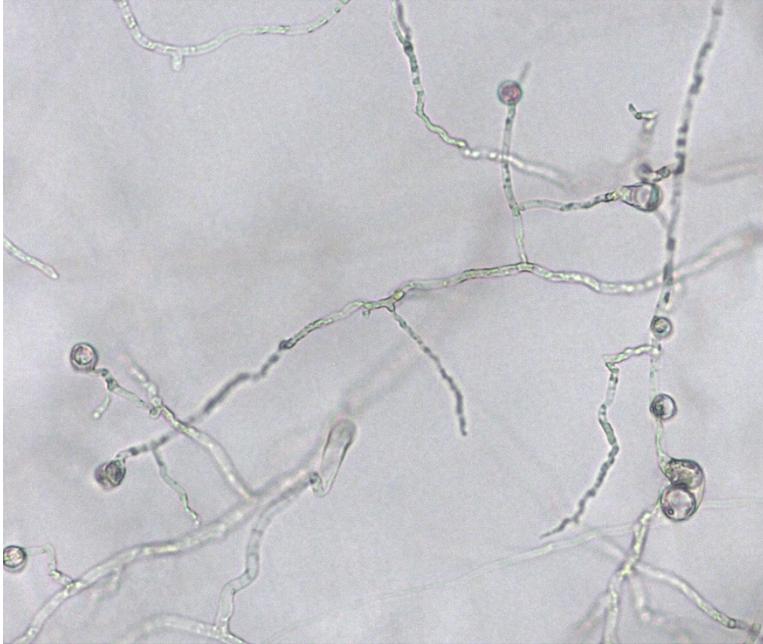

Group 2 – mostly *Pythium*

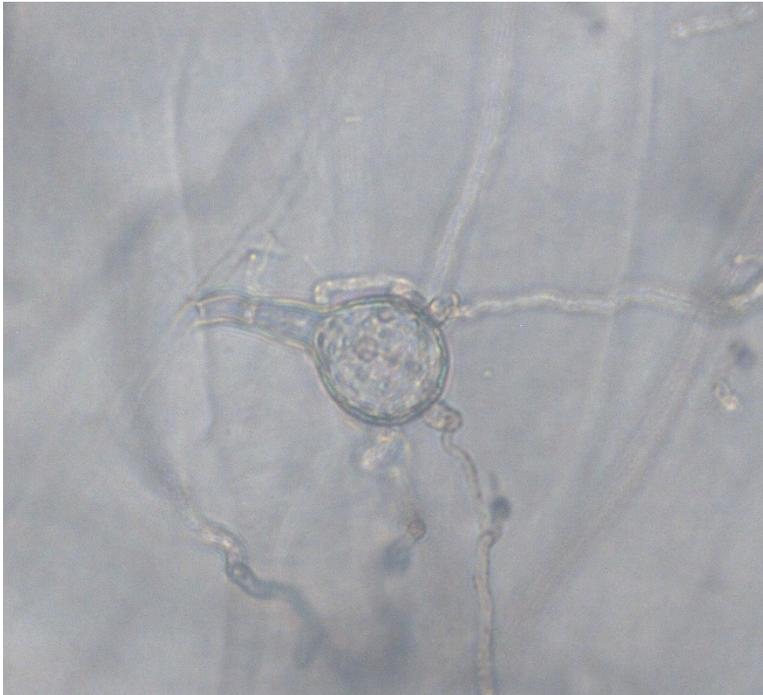

2A – rapid growth, filamentous sporangia with vesicles, appressoria. Photo 546.

2A1 – Photo 547.

2A2 – filamentous sporangia with vesicles, appressoria (100x). Photo 0548.

2A2 – oospore with diclinous antheridia (400x). Photo 0549.

2A3 – Photos 0550, 0551.

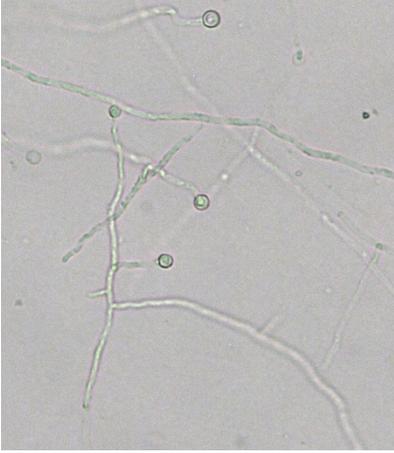

2A4 – contorted filamentous sporangia with vesicles. Photo 0552.

2A5 – photo 0553.

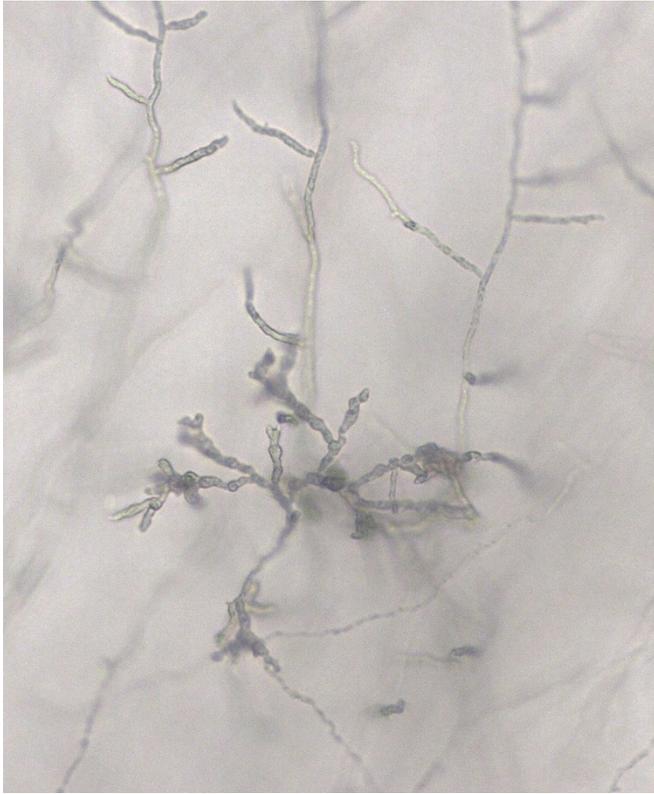

2B – inflated sporangia.

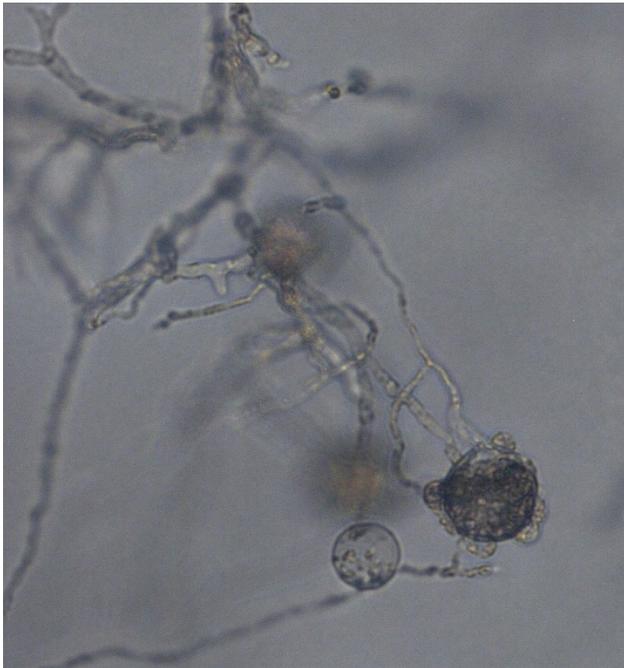

2B – typical morphology. Photo 0555.

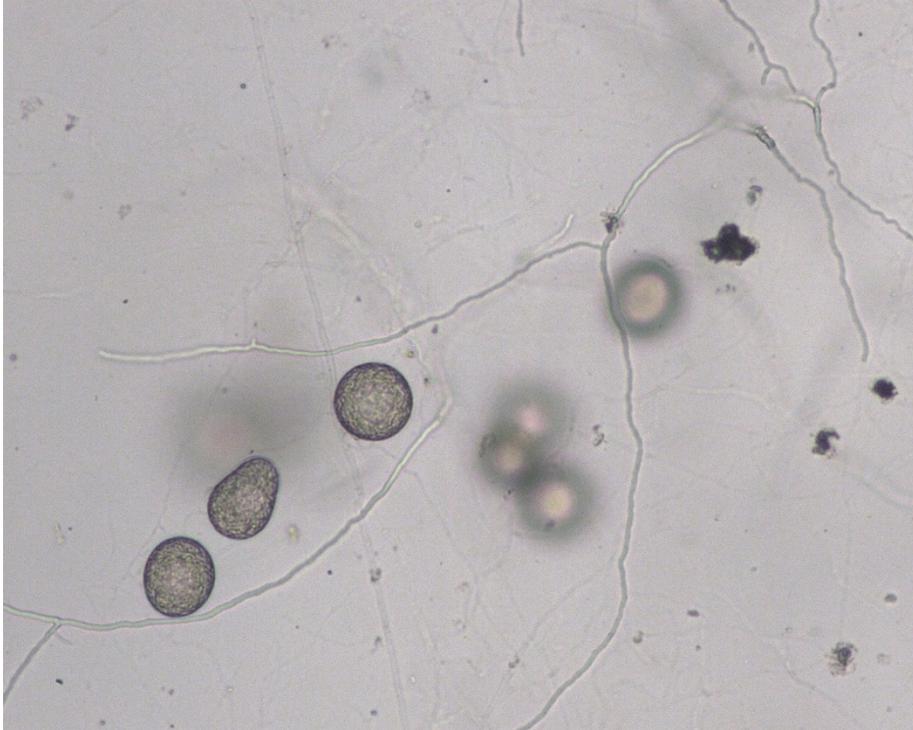

2F – Photo 0560.

3F – inflated sporangia. Photo 0532.

3F – oogonium with multiple antheridia. Photo 0507.

3N – immersed, contorted hyphae. Large round to oblong chlamydospores. Photo 0511.

3Q – Pythium with short, filamentous sporangia, narrow undulating hyphae, club-shaped appressoria. 400x. Photo 0525.
