

**Establishment of a Repository Containing Tissues and Organs of Deceased Workers
of the MAYAK Industrial Association Exposed to Actinide Elements**

Dr. Klara N. Muksinova, Ronald L. Kathren, John J. Russell

Executive Summary

The office of the Russian Human Radiobiology Tissue Repository (RHRTR) of FIB-1 was officially established and data file designated Common Information Chart of the Dead to include such information as occupational history, radiation exposure, radiochemical and medical information, and autopsy data was designed. Inventory of organ and tissue samples was initiated and completed for 50 cases; the inventory information for each case includes identification of all formalin-fixed tissue specimens and estimation information data obtained from a variety of sources.
