

**Establishment of a Repository Containing Tissues and Organs of Deceased Workers
of the MAYAK Industrial Association Exposed to Actinide Elements**

Dr. Klara N. Muksinova, Ronald L. Kathren, John J. Russell

Executive Summary

The inventory and characterization of all extant autopsy tissue materials of the next group of 50 registrants from the newly established Russian Human Radiobiology Tissue Repository (RHRTR of FIB-1) was accomplished. Occupational, dosimetric, radiochemical, and medical information essential for characterizing these registrants were obtained and processed. In addition, the histological quality of some of the formalin-fixed autopsy materials was examined in 10 selected cases.
