

**Establishment of a Repository Containing Tissues and Organs of Deceased Workers
of the MAYAK Industrial Association Exposed to Actinide Elements**

Dr. Klara N. Muksinova, Ronald L. Kathren, John J. Russell

Executive Summary

The inventory and characterization of all extant autopsy tissue materials of the next group of 50 registrants from the newly created Russian Human Radiobiology Tissue Repository (RHRTR) of FIB-1 was accomplished. Occupational histories of this group of registrants along with dosimetric, radiochemical, and medical information essential for complete characterization were obtained and analyzed. In addition, an inventory of tumor tissues collected at autopsy of 25 of these cases was conducted.
