TIDEWATER - Utilize existing and construct new infrastructure at McCall's Portland facility to create a renewable feedstock hub on the Willamette River. The project would transload vegetable oil feedstock from barges and vessels, convert an existing asphalt tank to feedstock, add new infrastructure to load and unload feedstock by rail, and use existing infrastructure to deliver renewable diesel (RD) to market by rail, barge, and truck. Also included is, improving the existing rail to include 12 spots for loading and unloading feedstock and RD, adding 2 additional spots for a total of 10 available for asphalt. Add two additional feedstock tanks and a pre-treatment facility.

TIDEWATER - Preliminary Fire Life Safety Meeting

LUCS for Joint Permit Application - Nationwide No: NWP-12. McCall Companies is proposing to upgrade their existing facility to create a renewable diesel feedstock hub at their Portland Terminal.

Construction Permits for the work approved in this review shall not be finaled until the BDS Zoning Permit for the landscape plantings is finaled, regardless of who is the applicant on the Zoning Permit.

The Conditions of Approval listed below, shall be noted on the appropriate plan sheets submitted for the zoning permit.

1. The Zoning Permit shall include inspection of a landscape plan for:

a. Invasive species removal within 10-feet of all Greenway plantings. The removal shall occur prior to installing required Greenway Landscaping plantings.

b. The planting of 69 native trees, 3,774 native shrubs, and a native groundcover seed mix over 94,338 square feet, in substantial conformance with the species and locations shown on Exhibit C.5 and detailed in Exhibit G.6.

c. The installation of a temporary irrigation system that provides water to all plantings for a period of not less than the first two summers after the plants¿ installation.

2. The plans shall include a planting table listing the species, quantity, spacing and sizes of plants to be planted in substantial conformance with the tables and locations on Exhibits C.5 and G.6. Any plant substitutions shall be selected from the Portland Plant List and shall be substantially equivalent in size to the original plant and identified as appropriate for the conditions at and location of the site. Conifers must be substituted with conifers. Flowering species must be substituted with flowering species.

3. Plantings shall be installed between October 1 and March 31 (the planting season).

4. All Greenway plantings will be in conformance with 33.248.090 Mitigation and Restoration Plantings.

5. All Greenway Landscaping shrubs and trees shall be marked in the field by a tag attached to the top of the plant for easy identification by the City Inspector; or the applicant shall arrange to accompany the BDS inspector to the site to locate plantings for inspection. If tape is used it shall be a contrasting color that is easily seen and identified.

Additional Conditions can be found in Correspondence Tab.

LUCS for DEQ - Air quality Notice of Construction, Air Contaminant Discharge Permit (excludes portable facility permits) and Air Quality Title V Permit. Applicant seeks this LUCS for purposes of obtaining an Air Contaminant Discharge Permit ("ACDP") that will facilitate the existing use's continued transition toward renewable fuels by (1) phasing out all crude oil at the site by October 3, 2027, and (2) reducing - through disassembly and removal by October 3, 2029 - 30 of the existing storage tanks on the site on October 3, 2022. These near-term changes will eliminate crude oil activity (whether by rail, marine, or otherwise) on site and continue to move the facility toward renewable fuels while also further improving resiliency. This LUCS will also serve to support Air Quality Notice of Construction (aka Notice of Approval) applications as needed to effectuate the activities.
