Reflection Paper 3

CptS 424 | Fall 2025

Note: This should be written in essay form, using paragraphs and not bullet points.

Prompt: Most recently in this class, we discussed the ethical considerations relating to the use of AI enabled facial recognition technologies. Students were assigned to groups and given the opportunity to present on a relevant case. For this short paper, we'd like you to reflect on the details of the case your group was not assigned. In other words, if your group presented on Case 1, then you should reflect on Case 2 and vice versa. If you need something concrete to look at besides your notes, remember that you can find that actual case information in Modules under Debate Project Resources.

In a 1.5 page reflection paper – double spaced, 11 or 12 point font (preferably Times New Roman), with 1 inch margins – please reflect on the ethical, legal, and related cybersecurity issues that stood out to you about the case. There's likely some overlap with the case your group presented on, so please feel to apply those to the new case or simply discuss details that stood out to you during the case presentations.

We're primarily looking for engagement with the topic and evidence that students are thinking about the issues.
